OBJECTIVE

I am a self-taught software developer with a focus on MERN stack. Experienced in crafting dynamic front-end interfaces and robust back-end solutions. Strong problem-solving skills and a keen interest in creating user-centric solutions.

PROFESSIONAL EXPERIENCE

MERN Intern - Plugins learn Ltd. | Jul 2024 - Jan 2025

- Gained hands-on experience in frontend and backend development, as well as database management.
- Developed projects using JavaScript, ReactJS, NodeJS and MongoDB.

PROJECTS

Metallica

Description : Metallica is an intuitive platform offering a wide range of stylish dresses and accessories, helping shoppers find the perfect outfits for any occasion with ease.

Technologies Used : React JS, Node JS, Mongo DB.

Foodio

Description : Foodio is a user-friendly platform for ordering delicious meals online, offering a wide variety of cuisines from local restaurants, quick delivery options, and secure payment methods for a seamless dining experience ,using NodeJS and MongoDB for data management and ReactJS for display.

Technologies Used : React JS, Node JS, Mongo DB.

MINI PROJECTS

Netflix Clone

Description : A Netflix clone web application that allows users to browse, search, and stream movies and TV shows. It features a sleek interface, multiple categories, and seamless playback for an engaging streaming experience.

MernInAuth

Description : MernAuth is a secure web application built with the MERN stack. It includes functionalities like user registration, login, password encryption, and protected routes, ensuring a seamless and secure experience for users.

Todolist

Description : A To-Do List web application that helps users manage tasks efficiently. It allows users to add, edit, delete, and organize tasks with features like task prioritization, deadlines, and reminders for better productivity.

Weather Application

Description : A weather web application that provides real-time weather updates, forecasts, and alerts based on user location. It features a user-friendly interface and detailed information on temperature, humidity, wind speed, and precipitation.
